

Donor Sperm Bank Information

We require all patients using donor sperm to use one of the following three sperm banks. Due to FDA regulations, we are required to confirm that any specimen in our lab, originates from an FDA regulated bank and that the proper donor screening was completed.

Our ordering recommendation:

Washed samples (“IUI” specimens) are *preferred* for IUIs (intrauterine insemination) but not required.

Unwashed samples (“ICI” specimens) are *preferred* for IVF (in vitro fertilization) but not required.

“Unwashed” specimens will be washed by The Fertility Center prior to use.

Specimen prices listed are per specimen and are only an *estimate* provided for your convenience. We cannot be held liable for price changes/variations. Refer to the sperm banks for exact pricing.
